

JOSHUA L GESCHWENDT

EXPERIENCE

Rocket · Staff Software Engineer

July 2025 – Present

- Rebuilt Rocket Mortgage's servicing platform from Angular to Next.js in six months, compressing a multi-year scope with AI-assisted development, and unified Rocket and Mr. Cooper clients on a single platform.
- Dreamed up, built, and shipped remote development environments: collaborative spaces that embed AI harnesses in the live application, letting any team make changes together from a URL with no setup.
- Mentor team members on AI-assisted workflows and present at biweekly AI syncs for 200+ participants.

Stack: Elixir · Next.js · Node.js · Rust · TypeScript

Rocket Homes · Staff Software Engineer

January 2021 – July 2025

- Led the migration of rockethomes.com to TypeScript and modern React, improving stability and usability across the platform.
- Defined the site's architecture and engineering standards, then led its move from a homegrown framework to Next.js.
- Repeatedly halved deploy and CI times, and cut dev-tooling startup from minutes to near-instant.

Stack: Next.js · Node.js · React · TypeScript

Cars.com (Dealer Inspire) · Senior Product Developer

November 2018 – December 2020

- Architected and built the chat component shipped across Cars.com and Dealer Inspire products, serving thousands of dealerships and millions of messages per day.
- Set TypeScript standards and architecture for the Conversations™ platform alongside its principal engineer.

Stack: Node.js · React · TypeScript

BLACK · Senior Software Engineer

August 2017 – November 2018

- Assessed client systems with strategists and designers, then built the software to close the gaps.

Stack: Elixir · Node.js · React · TypeScript

Varsity News Network · Senior Software Engineer

June 2016 – August 2017

- Built a modern WordPress theme and rolled it out across 2,000+ school athletics sites, significantly increasing traffic.
- Migrated the platform's PHP REST API to Elixir, adding GraphQL support, and its AngularJS app to React.
- Optimized ad-slot performance across the network, raising client CTR and company ROI.

Stack: Elixir · Node.js · PHP · React · WordPress

Springthrough · Applications Developer

November 2014 – June 2016

- Delivered client projects ranging from single-page applications to enterprise content management systems.

Stack: AngularJS · C# · Node.js

EDUCATION

Bachelor of Science, Computer Science & Engineering · *Specialization in Mathematics*
Michigan State University, College of Engineering
East Lansing, MI
