

JOSHUA L GESCHWENDT

EXPERIENCE

Dealer Inspire (Cars.com™)

Product Developer · November 2018 to Present

Today, I am responsible for maintaining the integrity of the TypeScript codebase on the Conversations™ Platform. I am involved in the product's evolution, including maintenance to the internal APIs and web applications, enhancing functionality and architectural components, and working with the product's support team.

Stack: Node.js · React · TypeScript

BLACK

Full-Stack Software Engineer · August 2017 to November 2018

Worked with strategists and designers to understand and evaluate an organization's current systems, processes, and technologies to develop strategies which enhanced what was working well and provided solutions where gaps existed.

For many clients, we built robust cloud and micro-service solutions.

Stack: CraftCMS · Elixir · Node.js · React · TypeScript

Varsity News Network

Senior Software Engineer · June 2016 to August 2017

As a lead frontend engineer I worked on two major initiatives. The first was to build a new modern WordPress theme which was rolled out to over 2000+ websites on the product platform. The new theme added responsive support and extensive customizations resulting in a significant increase of traffic. The second initiative was to optimize the company's advertising platform to enhance performance on available ad slots and ultimately increase CTR for customers and ROI for the company.

Stack: AngularJS · Elixir · React · Symfony · WordPress

Springthrough

Web Developer · November 2014 to June 2016

Worked in several teams of designers, developers, and project managers to build products and websites for clients across a wide variety of platforms and technologies. Solutions ranged from complex single page web applications to enterprise content management systems.

Stack: AngularJS · ASP.Net · C# · Sitefinity
